It's not normal to be in shock for 17 years after a breakup, or to still be in love enough for a Patronus after so much time. Obviously Patronuses revert back to original form once some of the grief of the loss has worn off. He's not saying "after all this time, you still have a reason to be loyal to me?"

Why would Dumbledore say "After all this time?" to Snape?

After all, the broken stones That were thrown, for no good reason
Inside, she's loving him still After all this time And though her heart
bears the scars No sign of healing, It's alright She's loving him still,
after all this time. Oh yeah Trying to push the past away Still
waiting for the lights to change

As the first cut from a new record, 'After All This Time' is a strong single to lead with. Produced by the legendary Scott Horscroft (Silverchair, DMA'S), the single feels like such a natural fit for Allday even though it's going to be something considerably different for fans to digest.

After a traumatic accident, Kyle feels lost until he meets Marley, who seems like the girl of his dreams, but as they grow closer he fears he is headed for another crash.

Harry Potter and the Deathly Hallows is the seventh and final novel of the Harry Potter series, written by British author J. K. Rowling. The book was released on 21 July 2007 by Bloomsbury Publishing in the United Kingdom, in the United States by Scholastic, and in Canada by Raincoast Books, ending the series that began in 1997 with the publication of Harry Potter and the Philosopher's Stone. The novel chronicles the events directly following Harry Potter and the Half-Blood Prince (2005), and the final confrontation between the wizards Harry Potter and Lord Voldemort. Rowling finished writing Harry Potter and the Deathly Hallows in January 2007. Before its release, Bloomsbury reportedly spent 10 million to keep the book's contents safe before its release date. American publisher Arthur Levine refused any copies of the novel to be released in advance for press review, although two reviews were submitted early. Shortly before release, photos of all 759 pages of the U.S. edition were leaked and transcribed, leading Scholastic to look for the source that had leaked it. Released globally in 93 countries, Deathly Hallows broke sales records as the fastest-selling book ever, a record it still held in 2012.[3] It sold 15 million copies in the first 24 hours following its release, including more than 11 million in the U.S. and UK alone. The previous record, 9 million in its first day, had been held by Harry Potter and the Half-Blood Prince. The novel has also been translated into over 120 languages."

Cancer sucks, death sucks even more. But we humans don't have the power to stop either of them from messing with our lives. They enter our lives whenever and wherever they choose to. Cancer is so common that each one of us have known someone who has dealt with the disease; some of us have lost a loved one to cancer. Common does not always mean simple, and it also does not mean we know everything about it. The diagnosis of cancer, regardless of the disease's curability, is almost always nerve-wracking, even for healthcare providers like the main character of this book who is a veteran nurse. This book is written in first person; the subject is a middle aged woman who had been separated from her boyfriend some thirty years ago and then after three decades when she searches for an oncologist for treatment of an aggressive cancer that she was recently diagnosed, she finds her ex-boyfriend's name and decides to see him. That brings back the memory of their past together, and she starts going through her old diary she had written some thirty years in the past. Part of the story is set in Nepal (from the diary) and the other part is set in the USA (this takes place after her cancer diagnosis). The main character of the story was born with ' Manglik ' cosmic influencer, meaning that the planet Mars " mangal Graha " was in such position in the solar system at the time of her birth that it would have strong negative effect on her husband if she married a man who was non-Manlik (a person born at the time when the planet Mars was not in such position.) What happens next changes the lives of the main characters.

Isn't it scary knowing that any moment could be the last one to look at someone? to talk to someone? This story is about an extraordinary yet common journey of a seventeen-year-old boy,

Madhav, suffering from a mishap. Who counts every extra breath as a blessing. Doctors are trying everything to keep him alive.

Madhav's few days in the hospital changes the surrounding people, including the doctors in an unimaginable and heart-melting way.

This is a hypersensitive story that shows us the struggle of the boy and the technicality of our society about a generic problem. Hope could be the most powerful tool upon which new worlds are fabricated and here in this story, Madhav spreads HOPE...
