eBundle: printed book and eBook download code ASA has built a reputation for providing the aviation
community with the most accurate and reliable FAR/AIM products available. The 2021 FAR/AIM book
continues this tradition, containing complete and up-to-date information from Titles 14 and 49 of the
Code of Federal Regulations (14 and 49 CFR) pertinent to General Aviation, Sport Pilots, Flight
Instructors, and Unmanned Aircraft System (UAS) operators, combined with the Aeronautical Information
Manual (AIM), and a free email subscription service for you to receive updated information as it is
released by the FAA. Convenient handbook-sized 6" x 9" format includes: Parts 1, 43, 48, 61, 67, 68,
71, 73, 91, 97, 103, 105, 107, 110, 117, 119, 135, 136, 137, 141, 142, NTSB 830, TSA 1552 Unabridged
text of AIM, including full-color graphics Pilot/Controller Glossary NASA Aviation Safety Reporting
Form The Pilot's Bill of Rights Additional features: FREE updates available online and via email
subscription service service for instant access to regulation changes as they are released throughout

the 1-year book lifecycle (sign up on ASA's website) Changes and updates since last edition clearly marked Suggested regulation study list for each certificate and rating Tabs included for quick reference Comprehensive FAR and AIM index. ASA's FAR/AIM books have been the standard regulatory reference of the industry for 75 years. ASA consolidates the FAA regulations and procedures into easy-to-use reference books full of information pertinent to pilots, flight crew, and aviation maintenance technicians.

The objective of this book is to provide ICAO, States, competent authorities and aerodrome operators with a comprehensive overview of legal challenges related to international aerodrome planning. Answers to derived legal questions as well as recommendations thereafter shall help to enhance regulatory systems and to establish a safer aerodrome environment worldwide. Compliant aerodrome planning has an immense impact on the safety of passengers, personnel, aircraft – and of course the airport. Achieving a high safety standard is crucial, as many incidents and accidents in aviation happen at or in the vicinity of airports. Currently, more than 40% of the ICAO Member States do not fully comply with international legal requirements for aerodrome planning. Representatives of ICAO and States, as well as aerodrome and authority personnel, will understand why compliance with the different legal facets of aerodrome planning is challenging and learn how shortcomings can be solved.

In accordance with ICAO provisions, countries are required to establish at every airport an emergency plan commensurate with the aircraft operations and other activities conducted at the airport. This manual will assist countries in the implementation of these specifications and thereby ensure their uniform application. Covers pre-planning for airport emergencies, as well as co-ordination between the different airport agencies and those of the surrounding community that could be of assistance in responding to an emergency. Includes a sample emergency exercise critique form, glossary, and references. Illustrated.

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

The new edition of an essential reference book for everyone who works in aviation.
