The design phase is crucial to overall biogas plant safety. The first line of defense comes from the various norms and codes that are there to protect public health and safety. By following established codes such as CSA, NFPA, OSHA, Building codes, etc., the designer ensures that the plant is safe for its

and operation of biogas digesters. Three types of digesters were reviewed, that is, the plug flow, floating drum and the fixed dome digester.

Biogas is one of the products formed during the anaerobic digestion process. Anaerobic digestion is dependent on several factors such as the pH value, feeding material, temperature,
