Cytotoxic Effect And Chemical Composition Of Inula Viscosa

Right here, we have countless book cytotoxic effect and chemical composition of inula viscosa and collections to check out. We additionally have enough money variant types and furthermore type of the books to browse. The enjoyable book, fiction, history, novel, scientific research, as capably as various further sorts of books are readily friendly here.

As this cytotoxic effect and chemical composition of inula viscosa, it ends stirring inborn one of the favored book cytotoxic

Its cytotoxic effect was evaluated by MTT assay. Essential oil with main components of α -pinene, trans-caryophyllene and 1,8-cineole inhibited *P. intermedia* with MIC and MBC values of 0.1 and 0.2 mg/mL.

~~Chemical composition, cytotoxic effect and antimicrobial ...~~

Harada et al. (2002) reported that palmitic acid, present in CsEO, has strong cytotoxic effect on cancer cells. The cytotoxicity of the essential oil could be explained by the wealthy content of this compound and/or the synergic effects of this active chemical with other constituents in the essential oil. Download :

The main components were 1,8-cineole (23.56%), camphene (12.78%), camphor (12.55%) and β -pinene (12.3%). The antibacterial activity of ROEO was evaluated by micro-dilution method. The oil exhibited inhibition and bactericidal effect against two strains: Staphylococcus aureus ATCC 9144 and Staphylococcus epidermidis S61.

The cytotoxic effects of MEC on different cancer cell lines are presented in Table 6. As the data suggest significant cytotoxic effects were noted in all the studied cancer cell lines treated with extract. The MEC at different concentrations induced gradual growth inhibition in HepG2, MCF7, Caco-2 and A549cells.

The chemical composition of essential oils is often variable among different plants and even between different plant parts. In addition, the composition may also differ according to the site of collection (geographical provenance), as their components play a major role in the plant adaptation to the ecology and the environment, including biotic and abiotic factors [1 , 2].
