(www.canammissing.com) People have been disappearing under mysterious circumstances for centuries. During the last 150 years the media has covered many of these cases and has attempted to put a rational spin on a very unusual event.After 3+ years and 7000 hours of intensive research there is a new paradigm being presented on people missing in the wilds of North America. "Missing 411" identifies 28 clusters of missing people who have vanished in remote areas of the continent. The finding is a troubling fact questioning why and how these people have disappeared. Some of the victims are found and tell a very interesting and mind bending story of their experience, others are never found, a fact that confounds searchers and law enforcement.There are many children that have disappeared under highly unusual circumstances. After weeks of searching and failing to find any evidence of the child being in a remote location, many parents and law enforcement draw the conclusion that the victim was kidnapped, yes, taken by someone

lurking in remote areas of our national parks, forests, farms and even ranches. There are two editions of this research, "Missing 411-Eastern United States" and "Missing 411-Western United States." The eastern United States copy has a list of every person who is listed in each book as well as a final conclusion to the investigation. You will be shocked by the lack of interest and documentation that many of our governmental bodies have committed to missing people. After reading these books you will never look at our wildlands the same.

box. Chances are, they will find a way to trivialize or ignore the disturbing evidence accumulated by David Paulides, a former law man turned investigative journalist. The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable. People are vanishing without a trace from our national parks and forests, yet government agencies are saying nothing. At a minimum, this story deserves space on the front page of every newspaper in the country, and it warrants a formal high level inquiry by the federal agencies whose files leave little doubt that something very strange is unfolding in our wilderness."George Knapp, Host, Coast to Coast AM

(www.canammissing.com) This is the third "Missing 411" book researching facts of people who have vanished in remote locations of the world. "Missing 411-North America and Beyond" is the first edition that discusses missing people and relevant facts from five countries (Australia, England, France, Iceland and Indonesia) outside of North America and examines the parallels between the cases. The book also includes a multitude of new stories from North America. There is a continuing trend of clusters of missing people in United States National Parks. The National Park Service has continued with their policy of failing to keep ledgers, track or otherwise document lists of missing people inside their parks and monuments. This edition has

cases from Florida, Texas, Hawaii and forty other states. There are new clusters of missing people from Sequoia and Mount Rainier National Park, Three Sisters Wilderness (OR) and Adirondacks (NY). Canada has missing cases from six provinces that are documented. This new book brings further clarity to the missing person issue by examining multiple disappearances of people in small-confined areas and exposing the similarities of their case. David Paulides also exposes a series of coed disappearances that date back to the early 1900's, which have unusual facts surrounding their case. "Missing 411-North America and Beyond" is the largest and most comprehensive of the trilogy, 472 pages. The Missing 411 series builds upon itself. It is recommended that you read "Missing 411-Western United States" first, then the eastern version and then "North America and Beyond." There is a historical aspect to this issue and there are common elements that run through the disappearances.

*****One of the early reviews of "Missing 411-North America and Beyond" was written by New York Times Best Selling author Whitley Strieber: David Paulides has shined a light onto one of the greatest and most disturbing mysteries of our time: the simple and awful fact that people disappear, especially in our national parks, and little effort is made to find them, let alone inform the public about the danger. This is the most comprehensive and expertly presented series of books on the subject ever written, and the latest volume, which includes stories from five countries, is sobering, chilling and far too well researched to ignore. Missing 411- A Sobering Coincidence is the fifth book in the acclaimed series about people who have mysteriously disappeared. Another comment; "The paper trail uncovered by Paulides through sheer doggedness is impressive, the evidence indisputable." Survivorman Les Stroud was interviewed about the series and stated, "Paulides presents pure facts. Facts that can't be disputed." The author continues with his profile points involving the disappearances and applies them to a series of incidents involving young men and women, mostly college age. Many of the victims vanished within the confines of their college or university town. These individuals were brilliant scholars, athletes and stellar people in their community. They disappear under unusual

circumstances and are often found in areas that were previously searched. Medical examiners in these cases often cannot determine the cause of death. Many times the victim was recovered in water, yet autopsies show the body was not in the water the entire time the victim was missing. The majority of the families in these cases believe their loved ones were abducted and held, then later dumped in the water. These allegations are generally ignored by authorities until pressured by facts presented through secondary autopsies that families requested and paid for. This is a chilling and shocking series of stories that will cause many parents and young people to rethink their nighttime activities. Missing 411- Off The Grid Missing 411- Off The Grid is the seventh book in the best selling series about missing people. The books are based on actual law enforcement, search and rescue and archived reports of incidents. The author has based the narrative on delivering the facts and not making unsubstantiated claims. Thousands of case files were reviewed and what's presented are incidents that fit narrow criteria of established profile points. According to the Urban Dictionary, Off the Grid means, "untraceable through normal means." The individuals that are documented in this seventh book of the Missing 411 series fit this definition to perfection. The disappearances involve physicists, physicians, professors, hikers, hunters, children, and joggers. Cases from thirty states, six Canadian provinces and five countries are included. Each of these stories is new to the Missing 411 series. Disappearances from national parks, forests and open spaces that have never been discussed or compared to similar instances are included.
