of easy-to-understand information on all relevant aspects, from protocol design, the fundamentals of statistics, and the use of computer-based tools through to the performance of clinical studies with different levels of evidence, multicenter studies, systematic reviews, meta-analyses, and economic health care studies. A key feature is a series of typical case examples that will facilitate use of the volume as a handbook for most common research approaches and study types. Younger researchers will also appreciate the guidance on preparation of abstracts, poster and paper presentations, grant applications, and publications. The authors are internationally renowned orthopaedic surgeons with extensive research experience and the book is published in collaboration with ISAKOS.

Our California antitrust and unfair competition law derives from statutes, policies, concerns, and history unique to our state. This new treatise is being launched to comprehensively document and describe this area of law which presents a broad and rich palette for practitioners and regulators. Highly experienced practitioners of differing perspectives were engaged to undertake a fresh, balanced and comprehensive review of each subject area of our state's antitrust and unfair competition laws. Teams of peer reviewers also drawn from the ranks of our state's leading practitioners were tasked with the review of every chapter. Several new subject matters addressing the application of our antitrust and unfair competition

regulation. Engaging approach to complicated laws and regulations such as HIPAA, FCRA, ECPA, GDPR, and CCPA.

The growth of Blockchain technology presents a number of legal questions for lawyers, regulators and industry participants alike. Primarily, regulators must allow Blockchain technology to develop whilst also ensuring it is not being abused. This book addresses the challenges posed by various applications of Blockchain technology, such as cryptocurrencies, smart contracts and initial coin offerings, across different fields of law. Contributors explore whether the problems posed by Blockchain and its applications can be addressed within the present legal system or whether significant rethinking is required.

Companies, lawyers, privacy officers, compliance managers, as well as human resources, marketing and IT professionals are increasingly facing privacy issues. While information on privacy topics is freely available, it can be difficult to grasp a problem quickly, without getting lost in details and advocacy. This is where Determann 's Field Guide to Data Privacy Law comes into its own – identifying key issues and providing concise practical guidance for an increasingly complex field shaped by rapid change in international laws, technology and society.

This two-volume set LNCS 11625 and 11626 constitutes the refereed proceedings of the 20th International Conference on Artificial Intelligence in Education, AIED 2019,
