The geology of the gold placers of Colorado: Parker, Ben H ...

Gold bearing placer streams in Colorado are generally many thousands of years old, sometimes millions of years old. In that much time, a stream can move around and erode much deeper into a valley. As this happens, cobble deposits containing gold can be orphaned, or left behind, by the flowing water. As the stream continues to erode deeper into the valley floor, the old riverbed cobble and gold deposit ends up sitting high and dry on a hillside.

The geology of the gold placers of Colorado (Book, 1961 ...

Oro City, now a ghost town, was an early Colorado gold placer mining town located near Leadville in the California Gulch. Oro is the Spanish word for gold . Oro City was the site of one the single richest placer gold strikes in Colorado, with estimated gold production of 120,000 to 150,000 troy ounces (4 to 5 metric tons), worth \$2.5 to \$3 million at the then-price of \$20.67 per troy ounce.
