(PDF) introduction to mathematical economics

In economics we mostly work with mathematical models. By their very nature these models contain variables which can be divided into two classes: 1) endogenous variables and 2) exogenous variables. Endogenous variables (from Greek, endo: within and genous: born hence born or generated from within the model) are those variables which the model

An Introduction to Mathematical Economics

Synopsis Scores of detailed, easy-to-follow, solved economics problems familiarize students with the methods and topics of mathematics as applied in a mathematical economics course. Each new problem is based on previously covered topics to reinforce understanding while illustrating interconnections and interrelationships.
