Irrigation water is conveyed in either open channel or closed conduits.

Open channels receive water from natural streams or underground water and convey water to the farm for irrigation. Open channels have free surface. The free surface is subjected

divided into three main sections:
Policy Options: Drip Irrigation Among Adopters
Irrigation Scheduling of Horticultural Crops
Design of Drip Irrigation Systems
The editors present valuable research and information on micro irrigation methods in an effort to focus on innovation and evolving

Micro Irrigation Engineering for Horticultural Crops: Policy Options, Scheduling, and Design will be valuable for agricultural engineering students, irrigation engineers, and scientists/professors in engineering.

This textbook focuses specifically on
