Although indirect laryngoscopy is a “ low-
tech ” method of laryngeal evaluation,
facility with the technique requires
significant practice, and most physicians
have abandoned it in favor of the easily
performed and well-tolerated flexible
laryngoscopy. As a result, indirect
laryngoscopy is rapidly becoming a lost art.
Although the days of an otolaryngologist (let
alone a primary care physician) wearing a
head mirror may be numbered, indirect
laryngoscopy is still commonly used as a ...

After a solid introduction to laryngeal anatomy and physiology, separate sections cover the entire spectrum of laryngeal imaging systems. The authors place special emphasis on the interpretation of abnormal vibratory characteristics through practical discussion of the differential diagnosis of specific abnormalities and the impact of various types of laryngeal pathology on the vocal cords.

Laryngeal Evaluation: Indirect Laryngoscopy to High-Speed ... Stroboscopy is not the only technique available for a detailed evaluation of laryngeal movement and pathology; others include electroglottography, videokymography, and high speed digital imaging, and some techniques may be complementary. 34 High speed digital processing has the advantage of capturing images as often as 5000 frames per second,

Read Book Laryngeal Evaluation Indirect

acquiring many images from within a single glottic cycle, rather than relying on the multiple cycles that constitute the stroboscopic motion ...
