This Brief proposes a criminological typology for understanding and addressing police misconduct. Through examination of each major type of police misconduct, the author proposes future research directions to deter and prevent misconduct. According to an examination of 50 years of police misconduct cases within the New York Police Department (NYPD) and Los Angeles Police Department (LAPD), the author proposes 5 major typologies: police corruption, police criminality, excessive use of force, abuse of authority, and police misconduct. Through a systematic examination of each of these five types, the author aims to break down the nebulous topic of police misbehavior into manageable categories, with their own set of causes, and recommendations for detection and prevention. This work will be of interest for researchers in criminology and criminal justice, particularly with an interest in police studies, and related fields such as public policy and sociology. It will also be of interest for policymakers.

The Police Misconduct Complaint Investigations Manual provides a timely and unique, step-by-step

approach to conducting or reviewing police misconduct investigations, whether a complaint involves a lower level allegation of discourtesy or more serious concerns such as excessive force or criminal behavior. Utilizing real-life examples and updated case law to illustrate points, it provides best practices for investigating police action resulting in misconduct complaints. The Manual's comprehensive approach includes detailed procedures and policy considerations from intake through case closure, and discusses data tracking, reporting on trends, selecting and training investigative staff, civilian oversight, and a host of special issues that can arise with police misconduct complaints. The Manual is suitable for both sworn personnel and civilians handling or reviewing investigations and whether working internally for a police department or externally in oversight or another capacity. The guidance provides detailed examples of witness interview questions and types of evidence to collect, with discussion on making difficult credibility determinations and approaches to analyzing the information gathered to arrive at a recommended finding. Review questions are found at the end of most chapters, for use in academic or investigative training environments. Police officers engaged in the often complex and challenging work of public safety deserve and expect objective, thorough, and timely handling of complaints. Complainants and other stakeholders seek accountability and transparency when an officer behaves in a way that raises questions about their professionalism. The Complaint Investigations Manual provides instruction on handling misconduct complaints in a manner that will ensure the goals of law enforcement and stakeholders are met. The authors intentionally use a broad approach to make the Manual relevant and easy to use by law enforcement personnel, civilians in oversight or other capacities who work on police misconduct matters, and the criminal justice academic community. It is a critical primer for internal affairs investigators, police managers, law enforcement leaders, auditing professionals, civilian oversight practitioners, government representatives, community advocates, criminal and social justice students, and all others in pursuit of fair, thorough, and timely investigations of police misconduct complaints.

"In the course of twenty-five years' practice as a physician specialising in nervous and mental disorders a

large number of people have come under my observation and treatment, suffering from character defects leading to moral failings--some complaining of a tendency to misconduct, which remained a tendency only; others being brought to me for the evil they had already committed, doing harm to themselves or to others. Some of these were addicted to the drink or drug habit, some to sexual perversion, some to ill-temper and violence; while others were youthful liars, thieves, or profligates. Finally, a considerable number consisted of semi-insane and semi-responsible young men and women, morally deficient--sometimes together with mental defect; sometimes mentally so superior, at least in cunning and conversational gifts, as to be admired by everyone with whom they came into contact, until found out. It will be seen, therefore, that the cases of moral derangement which come before the mental specialist are of all kinds; only the professional thief and burglar, and the downright scoundrel, do not consult the physician. This book contains the results of my reflections on these experiences. It is written from the standpoint of the "new psychology," dealing successively, in accordance with their evolution, with the primary emotions and instinctive tendencies which are at the basis of all human behaviour, normal and abnormal. It will be shown that morality is a gradual growth, arising from the conflict between the unconscious instinctive tendencies to self-gratification and self-preservation, and the gregarious instinct which produces in man the various affections, parental, filial, and social, and ultimately tends to altruistic conduct. Some people are naturally moral, some are inherently selfish, and others--perhaps the great majority--are conscious of the two tendencies within them, and remain moral under temptation solely from fear of consequences. The morally deranged can be distinguished from the professional criminal class by the lack of self-control. They are conscious of thoughts and impulses towards evil-doing which they desire to inhibit, but lack the power to do so. They come to the physician to do for them what they cannot do for themselves. In the actual criminal there is no conflict; he "wills" to do wrong. It is the business of the doctor to reform the former; it is the business of the law to punish the latter"--Preface.
