Physically, the marine VHF radio is a combined transmitter and receiver, often called a transceiver. The PTT (Push to Talk) button located on the microphone or handset, controls which mode the radio is in at that moment. When you depress the PTT the radio becomes a transmitter when you release the PTT the radio returns to the receiver mode.

VHF Marine Radio #1 Question - Range How Far Can I Transmit?

use of GMDSS radio equipment & documents for emergency procedures, Maritime Safety Information & general communications actions in the event of false distress alert transmission The Simulator provides documentation on GMDSS theory based on the IMO GMDSS Handbook, software models of typical ship ' s GMDSS radio equipment (based on Skanti-1000 series) and an assessment program to test student knowledge.
