The Rockford Fosgate signature sound includes our PUNCH bass tuning. Road and powertrain noise can often drown out the lower portion of the sound spectrum, so supplementing the lower frequencies makes the music experience more full, exciting, and enjoyable in real-world driving situations. DSP Tuning precisely tailors audio signals to each speaker

system in it. I am not getting any sound out of my speakers. I have replaced the amp but nothing changed. Is there anything between the head unit and the amp that could possibly have gotten damaged? Or does the wiring go directly to the amp from the head unit without any sort of intermediary wiring harness or something to go through?

I have a 2009 Mitsubishi Outlander with the Rockford Fosgate sound system. The amp has quit working. Does it have to be replaced with the exact amp or is there another compatible option? What are the specifications of the Rockford amp that is currently installed? Is there a diagram that shows what wires go where on the pins that plug into the amp?
