The papers and posters in this volume were presented at the conference "Tempera painting between 1800 and 1950 Experiments and innovations from the Nazarene movement to abstract art held at the Doerner Institut, in cooperation with the Academy of Fine Arts, Munich. They explore the revival of tempera painting between 1800 and 1950 from the perspectives of art history, technical art history, conservation and scientific analysis.

This book is open access under a CC BY 4.0 license "Francesca Billiani and Laura Pennacchietti draw brilliantly and with precision the evolution of the new architecture and of the national novel (with insights on translations of international novels), whose profiles had been shaped from different angles, especially in the 1930s. These two fields, apparently so distant one from the other, had never been analysed in parallel. This book does this and uncovers several points of contact between the two, spanning propaganda and theoretical turning points." — Chiara Costa and Cornelia Mattiacci, Fondazione Prada, Italy "This book shows convincingly how the arte di Stato during Fascism was created with the morality of a new novel as well as architecture. It is surprising to read how one of the representatives of State art, Giuseppe Bottai, is also one of the finest critics of realist novels and rationalist architecture. More than parallel endeavours, the system of the arts during the Fascist regime should be viewed as a series of intersections of cultural, political and aesthetic discourses." — Monica Jansen, Utrecht University, The Netherlands Architecture and the Novel under the Italian Fascist Regime discusses the relationship between the novel and architecture during the Fascist period in Italy (1922-1943). By looking at two profoundly diverse aesthetic phenomena within the context of the creation of a Fascist State art, Billiani and Pennacchietti argue that an effort of construction, or reconstruction, was the main driving force behind both projects: the advocated "revolution" of the novel form (realism) and that of architecture (rationalism). The book is divided into seven chapters, which in turn analyze the interconnections between the novel and architecture in theory and in practice. The first six chapters cover debates on State art, on the novel and on architecture, as well as their historical development and their unfolding in key journals of the per iod. The last chapter offers a detailed analysis of some important novels and buildings, which have in practice realized some of the key principles articulated in the theoretical disputes. Francesca Billiani is Senior Lecturer in Italian Studies and Director of the Centre for Interdisciplinary Research in the Arts and Languages at the University of Manchester, UK. Laura Pennacchietti is Research Associate in Italian Studies at the University of Manchester, UK.

We live in an age in which one can easily think that our generation has invented and discovered almost everything; but the truth is quite the opposite. Progress cannot be considered as sudden unexpected spurts of individual brains: such a genius, the inventor of everything, has never existed in the history of humanity. What did exist was a limitless procession of experiments made by men who did not waver when faced with defeat, but were inspired by the rare successes that have led to our modern comfortable reality. And that continue to do so with the same enthusiasm. The study of the History of Engineering is valuable for many reasons, not the least of which is the fact that it can help us to understand the genius of the scientists, engineers and craftsmen who existed centuries and millenniums before us; who solved problems using the devices of their era, making machinery and equipment whose concept is of such a surprising modernity that we must rethink our image of the past.

A major new account of the role and performance of the Italian army in the First World War. Setting military events in a broad context, Gooch explores pre-war Italian military culture, and reveals how an army with a reputation for failure fought a challenging war in appalling conditions - and won.

At the end of the First World War, countries across Europe participated in an unprecedented ritual in which a single, anonymous body was buried to symbolize the overwhelming trauma of the battlefields. The Tomb of the Unknown Soldier explores the creation and reception of this symbolic national burial as an emblem for modern mourning. Bringing together literature, newspaper accounts, wartime correspondence, and popular culture, The Tomb of the Unknown Soldier examines how the Unknown Soldier was imagined in diverse national contexts and used by radically opposed political parties. Laura Witman argues that this monument established a connection between the wounded body vulnerable to the war machine and a modern identity defined by common mortality and social alienation. Highly original and interdisciplinary, The Tomb of the Unknown Soldier powerfully links the symbolic language and ethics of mourning to a fascinating national ritual.
