From Team Explorer 2013, connect to the server and team project collection where you want to create your team project. Team Explorer is installed with Visual Studio. Or, you can install Team Explorer for free. You must connect from a client that is at the same version level as TFS. That is, you must connect to TFS 2013 from Team Explorer 2013.

Team Foundation Server 2013 (TFS) Step by Step ...

October 16, 2013 by Ben Day. I’ve been spending a lot of time playing with Team Foundation Server 2013 lately and I’ve done a handful of installs. I created an installation guide with screenshots of each step to help make the process go more smoothly. At the moment, it only has Chapters for installing Windows Server 2012, SQL Server 2012, and Team Foundation Server 2013 but I’ll be adding chapters on installing TFS Build servers and test controllers/agents for both load testing and for ...

When installation finishes, the installer starts the Team Foundation Server Configuration Center. For TFS 2017 and later versions, a unified wizard supports all TFS configurations, such as new installations, upgrades, and application-tier-only scenarios. For TFS 2015 and earlier versions, select the appropriate wizard for your scenario.

Install and configure - Azure DevOps | Microsoft Docs

Following on my tradition of writing an illustrated installation guide for TFS2010, TFS2012, and TFS2013, here's my TFS2015 Installation Guide. Since this is the 1.0 version of the guide, it covers just the essentials — installing Windows Server 2012 R2 for TFS2015, installing the pre-requisites for TFS2015, installing SQL Server for TFS2015, and then how to install Team Foundation Server 2015 itself.

Team Foundation Server 2015 (TFS2015) Installation Guide ...

After you save the file locally, you can view its contents by using one of the following methods: Method 1: 1) Double-click the file. 2) In the Open File-Security Warning dialog box, clear the Always ask before opening this file check box. 3) Click Open. Method 2: 1) Right-click the file, and then click Properties.

Download TFS Install and Administration Guides from ...

To install the application tier and the extensions: Open the administration console and start the configuration process. If you don't see the administration console for TFS, you haven't installed the TFS software on the server. To learn how, go to Install Team Foundation Server. Launch the application-tier only wizard.

Install & configure - Azure DevOps | Microsoft Docs
