The Bizarre World of Animal Reproduction. April 12, 2013 Melissa Leave a comment. As weird and whacky as some human mating practices can sometimes be, other animals' reproductive habits can be even stranger at times. While one species gives birth through a penis, another's testicles' explode after sex. Further, post-coital cannibalism and ...

### *The Bizarre World of Animal Reproduction*

Animal reproduction is a complex and varied set of processes which all have the same goal: to produce offspring. It requires various physical and behavioral transformations which are controlled by hormone production and other factors.. For animals to reproduce, they need to reach sexual maturation.

### *Types of Animal Reproduction - Definitions and Examples*

When in the mood to reproduce, a female wasp hunts down a hapless spider by the euphonious name of Plesiometa argyra and paralyzes it for 10 or 15 minutes with a sting. In that quiet quarter of an hour the wasp lays an egg, gently attaches it to the spider's belly and departs.
