Working with Texts: A Core Book for Language Analysis provides a basic foundation for understanding aspects of English language crucial in the analysis of text. The major topics covered include writing, the sound system of spoken English, words, sentence grammar and discourse construction. The wide range of texts examined include literary extracts from prose fiction (Jeanette Winterson, Anne Tyler), poetry (D. H. Lawrence, Margaret Atwood), drama (John Godber) and graphic novels (Neil Gaiman), but also a huge diversity of texts from contemporary media: newspaper articles, advertisements (Gap,

Kelloggs), political speeches and original authentic materials (children's writing, signs, everyday conversation). Student-friendly features include: * Activities showing how language works in texts and their contexts * Commentaries which follow each activity, highlighting main points of language use * Wide coverage of different genres: literary texts, notes, memos, signs, advertisements, leaflets, speeches, conversation * Suggestions for further reading and additional self-study exercises * Key words highlighted and a full index of terms Ideal for introductory courses to English Language and Literature and Linguistics. Also of interest to students of media and communication studies.

The core textbook in the popular Intertext series, Working with Texts introduces students to the main principles of language analysis, through real text examples. Featuring a wealth of contemporary examples of English in use, the book is supported by clear and accessible explication and commentary.

Julia Gillen introduces the key theories of language acquisition and provides a historical overview of the subject. She looks at all the ways children learn to communicate, from writing and talking to playing and using computers.

With more and more scientific language being applied -and misapplied- in our daily lives, this title from the Intertext series explores the use of scientific terms through hot topics from the MMR vaccine to AIDS and biological weapons

The Intertext series has been specifically designed to meet the needs of contemporary English Language Studies. Working with Texts: A Core Introduction to Language Analysis (second edition 2001) is the foundation text, which is complemented by a range of 'satellite titles. These provide students with hands-on practical experience of textual analysis through special topics, and can be used individually or in conjunction with Working with Texts. Language Change: examines the way external factors have influenced and are influencing language change, focusing on how changing social contexts are reflected in language use explores the attitudes, values and assumptions that shape the way we use language looks at how language change operates within different genres, such as problem pages, sports reports and recipes provides lively examples from everyday communication, including letters, emails, postcards and text messages includes a unit on how new words are formed and features a full glossary.

Language and Region: provides an accessible guide to regional variation in English covers topical issues including loss of regional diversity and attitudes to regional accents and dialects examines the use of dialect in media, advertising and the tourist industry outlines the main linguistic characteristics of regional accents and dialects in terms of regional pronunciation, vocabulary and grammar. Affording hands-on practical experience of textual analysis, this book is essential reading for students of English language studies.

Introducing Electronic Text Analysis is a practical and

much needed introduction to corpora – bodies of linguistic data. Written specifically for students studying this topic for the first time, the book begins with a discussion of the underlying principles of electronic text analysis. It then examines how these corpora enhance our understanding of literary and non-literary works. In the first section the author introduces the concepts of concordance and lexical frequency, concepts which are then applied to a range of areas of language study. Key areas examined are the use of on-line corpora to complement traditional stylistic analysis, and the ways in which methods such as concordance and frequency counts can reveal a particular ideology within a text. Presenting an accessible and thorough understanding of the underlying principles of electronic text analysis, the book contains abundant illustrative examples and a glossary with definitions of main concepts. It will also be supported by a companion website with links to on-line corpora so that students can apply their knowledge to further study. The accompanying website to this book can be found at http://www.routledge.com/textbooks/0415320216

The core textbook in the popular Intertext series, Working with Texts introduces students to the main principles of language analysis, through real text examples. Featuring a wealth of contemporary examples of English in use, the book is supported by clear and accessible explication and commentary.

Language, Society and Power is the essential introductory text to studying language in a variety of social contexts. This book examines the ways

language functions, how it influences thought and how it varies according to age, ethnicity, class and gender. It considers whether representations of people and their language matter, explores how identity is constructed and performed, and considers the creative potential of language in the media, politics and everyday talk. This fourth edition has been completely revised to include recent developments in theory and research and offers the following features: A range of new and engaging international examples drawn from everyday life – including material from social media and newspapers, cartoons, YouTube and television. Two new chapters which cover Linguistic Landscapes, including signs, graffiti and the internet; and Global Englishes, exploring variation in and attitudes to English around the world Updated and expanded student research projects and further reading sections for each chapter Brand new companion website that includes video and audio clips, links to articles and further reading for students and professors. Language, Society and Power is a must-read for students of English language and linguistics, media, communication, cultural studies, sociology and psychology.

In this student-friendly guidebook, leading language authority Professor David Crystal follows on from his landmark bestseller, Language and the Internet and takes things one step further. This book presents the area as a new field : Internet linguistics.
